

Kaitlin Lovell

Since 2007, Kaitlin has managed the Science Integration Division for the City of Portland Bureau of Environmental Sciences, which provides ecological, biological, and water quality technical assistance on watershed policy, projects, and planning efforts, including watershed monitoring and salmon recovery, and environmental regulatory compliance; and oversees the City's efforts under the Endangered Species Act. Kaitlin oversaw the efforts to restore Crystal Springs Creek for salmon, is the architect of the Salmon Sanctuary concept, currently a co-lead for the FEMA Biological Opinion implementation and is a co-author of the 2014 Climate Change Preparation Strategy and its companion, the Climate Change Risk and Vulnerabilities Assessment. Prior to working at the City of Portland, Kaitlin was Salmon Policy Coordinator and Counsel for Trout Unlimited based in the Portland office. Kaitlin has a B.S in Environmental Science from Bucknell University and a J.D from Cornell Law School and is licensed to practice in Oregon.
